# VISCOSOFT®
460 FC

testing equipment for quality management

ERICHSEN

Technical Description
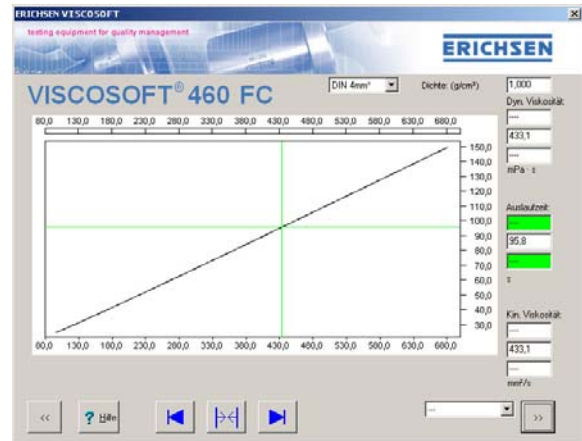

Software for rapid conversion between viscosity and efflux

time to be used with standardized flow cups

VISCOSOFT® 460 FC

Software for rapid conversion between viscosity and efflux time to be used with standardized flow cups.

- The clearly arranged graphics immediately show the measuring ranges of the standardized flow cups (DIN, ISO, ASTM)

- Relation between efflux time and viscosity (kinematic and dynamic) in a diagram

- Helps to select the appropriate flow cup

- Comfortable conversion by numerical input of values for viscosity, efflux time or density

- Indicates simultaneously the efflux times of flow cups with overlapping measuring ranges

- Converts between dynamic and kinematic viscosity

- Easy handling by operating a few keys by using the mouse

- Operating instructions in English/ French/German

- System requirements: Windows 98, 98 SE, 98 ME, 2000, XP oder NT
